The exhibition and screening uses the analogy of throwing a boomerang as an action from the observed world through an artistic lineage to return to a point near its beginning. Each flight is unique, the product of the artist's interpretative "throw" and the artistic truths of the past are encountered as the boomerang rotates into the present. The result is a new point of reference.

In **BOOMERANG**, film, installation, drawing, collage and painting gives us an intimate look at art of the moment and a reminder that the movement of art in history is not a simple forward motion.
